WHY DOES IT MATTER TO US ?

It is the young people of today who are building the planet of tomorrow.

As education professionals we must ask ourselves: how can we empower our youth to drive progress in developing a better world ?

In an engineering and entrepreneurial spirit, students ages 11 to 16 engage in hands-on innovation and business creation projects to help the world in a new way.

Bring your project to life !

Micro-Engineering

Learn how to build and code a flying drone engaged into social or environmental projects

Leadership

Develop the attitudes, skills and knowledge to bring your project to life

Program in French and English, 24 hours/week,
university-level coaches and teachers

Where the fun never ends...

Personalized family environment

Beautifully located in nature, overlooking the Geneva lake and the Alps, Chantemerle offers a peaceful and well-balanced family environment. Comfortably accommodated in our chalet-style boarding school, over 60 students from all over the world live together under permanent supervision by a team of professional educators.
