WHY DOES IT MATTER TO US ?

It is close to our hearts

It is the young people of today who are building the planet of tomorrow.

As education professionals we must ask ourselves: how can we empower our youth to drive progress in developing a better world ?

In a scientific and entrepreneurial spirit, students ages 14 to 17 enrolled in "Inventors for a better world », Chantemerle's flagship Science & Innovation program, engage in hands-on Science and Coding to explore how simple innovation ideas can help make a " better world".

Help the world in a new way

Learn about water & energy

A series of fun and hands on scientific experiments around water and energy to build awareness and involvement in protecting natural resources around the world.

Build and program Arduino

Program the Arduino micro-controller to measure the world around you (noise, temperature, humidity, water purity). Keep Arduino alive in the field using solar energy.

Become an entrepreneur

Analyse LED-Safari, a Swiss start-up company with an innovative idea to make the world better. Learn to turn the idea into a real product, with a business plan to bring it on the market,

Bilingual hands on course (English / French), 24 hours/week, university-level trainers from Ireland and Switzerland

Where the fun never ends..

Personalized family environment

60 students from all over the world comfortably accommodated in our chalet-style boarding school under permanent supervision by a team of professional educators.

Rich program of after class activities

Team sports (football, basketball, volleyball), mountain adventures, stand-up paddle/kayaking, indoor climbing, artistic workshops and games.
Europa-Park (D)

Discover Switzerland

Visit Lausanne and the EPFL, the Nestlé chocolate factory and the Bex salt mines, Bern medieval town and the Paul Klee Museum, Geneva and the Red Cross, and much more..
